Low Rates Lighting a Fire Under Housing/Mortgage Markets

You've heard of time healing all wounds, but what about low rates healing the mortgage and housing markets? It's not that either was particularly distressed, but **both** have benefited in a **major** way from the recent drop in rates. Just as important as the drop itself has been rates' ability to **HOLD** at or near long-term lows for 2 full weeks now.

It's not at all uncommon for rates to make big moves from time to time. When that happens, it's far more common to see the most extreme rates (either highs or lows) persist for a few hours to a few days. This is easy to see in the bar chart of 10yr Treasury yields below. Notice the previous surges toward lower rates in 2019 were **quickly turned away** while the most recent surge has had some serious staying power.

10yr Treasury Yield

The reason this is such a profound benefit for the mortgage market is that it allows a far greater portion of eligible homeowners to **hear about** the move in rates while they **still have time** to take advantage of it. This was the reason

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

that I predicted a massive surge in refinance demand in last week's Newsletter with the following chart:

And here's the **most up-to-date version** of the same chart after this week's application data came in:

In other words, **persistent availability of the lowest rates since September 2017** had a perfectly logical impact! In addition to the surging refi demand, low rates are also boosting purchase activity and leading to **improvements in lender sentiment**.

Can the good times keep rolling? This is a great question--especially considering the longevity of the rate rally to date. It's impossible to answer, unfortunately, without knowing how key events will unfold. These include various economic reports, Fed policy changes, and any political developments that fall under the "trade war" category.

What we **do know** is that we'll receive important updates on all fronts in the coming weeks. These include a new policy announcement from the Fed next Wednesday, the G-20 summit at the end of the month, and an extremely important slate of economic data in the first week of July. In general, the worse things look for the economy, the better the odds are for rates to continue lower. An accommodative response from the Fed (i.e. if they offer hints about rate cuts) would **solidify and accelerate** such a move.

While the Fed Funds Rate doesn't directly affect conventional mortgage rates, the market's **expectation** for Fed rate hikes/cuts is a **different story**. As speculators have gradually increased their calls for 3 rate cuts by the end of 2019, longer-term rates (represented below by 10yr Treasury yields) have followed a substantially similar path.

This makes next week's Fed announcement (and press conference) all the more important. Keep in mind that the market's expectation is **already** reflected in today's interest rates. Investors are expecting the Fed to do/say **something** to acknowledge weaker economic data and increased global growth headwinds. To whatever extent the Fed isn't "concerned enough" in the eyes of traders, rates could move back up just as easily as they could continue to fall.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
