It's Time To Refinance (Again)

Markets continue to focus on coronavirus numbers first and foremost. When the news is **good**, we tend to see stocks and rates move higher. When the news is **bad**, rates tend to fall and stocks struggle to improve.

The movement is usually more pronounced for stocks. When it comes to rates, however--especially mortgage rates--recent volatility is taking place at a microscopic level compared to recent months. This could continue to be the case until we get a **much clearer** sense of how the pandemic will likely evolve in the context of our attempts to reopen the domestic economy.

Until that happens, of all the places to be flying in a relative holding pattern, this is **as good as it gets** for mortgage rates. When coronavirus first hit the bond market, it was US Treasuries that responded most convincingly. Mortgage rates weren't able to keep pace and that turns out to have been a good thing in hindsight.

Because mortgages lagged Treasuries (the 10yr Treasury yield is the customary point of comparison), they've been more capable of moving lower on the good days and less susceptible to moving higher on the bad days. The net effect is a string of ever-lower all-time lows.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

No... really... this isn't just a term that's being thrown around interchangeably with "really low rates." The average lender is now able to offer conventional 30yr fixed rates in the **high 2% range** for the best scenarios.

That means some homeowners are in a position to benefit from a refinance even if they already refinanced in the past year.

But isn't it a lot of work to refi again?

While some scenarios are more complicated than others, on average, loan applications are seeing an unprecedented amount of appraisal waivers. The industry has worked quickly to adapt to new realities and in many cases, that has made things easier for borrowers.

But aren't there a lot of costs that I'll have to pay that I just paid the last time I refinanced?

Not necessarily. There are different kinds of closing costs. In general, you can **ignore** "stuff you would have paid anyway" like taxes, insurance, and prepaid interest. You won't get hit for those twice.

There's a good chance the lender can pay for a most or all of the other fees like title, escrow, origination, appraisal, etc. Either way, borrowers should consider how long it will take to break even on the refinance by dividing those new hard costs (if any) by the monthly payment savings.

But what if haven't refinanced recently and don't have as many years left on this mortgage.

You'll need to do some math here, but generally speaking, if you continue making the same payment but with a new lower interest rate, you might find your home will be paid off sooner with the new loan.

The bottom line:

The current low rate environment is like nothing we've ever seen before. It's easy to tune out the constant advertisements and news stories about "all-time low rates," but this time around, the refinance process is very much worth investigating right now.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
