Rates at 3-Week Highs, More Volatility Ahead

As recently as Thursday, August 6th, the average mortgage rate headline proclaimed the **lowest** rates in 6 months. That wasn't true on Thursday, and it's even less true today.

Were the other headlines **lying**?

No, not intentionally. The source of the confusion is Freddie Mac's weekly rate survey--the most widely cited source material for journalists who **aren't** necessarily dedicated mortgage rate reporters.

Freddie's methodology technically allows for survey responses on Monday through Wednesday, but it's a safe bet that **most** of the responses are in on Monday based on how the survey has performed over the years.

Rates were excellent at the beginning of the week. To Freddie's credit, they were indeed the lowest in 6 months. But that began to change on Wednesday. By the time Freddie released the survey on Thursday morning, we were **already** well on our way to **3-week highs**, and Friday made it official.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

30yr Fixed Mortgage Rates

- Survey-Based, Weekly, Best-Case
- Actual Daily Avg, Including Refis

Notably, these 3-week highs are still historically low.

30yr Fixed Mortgage Rates

- Survey-Based, Weekly, Best-Case
- Actual Daily Avg, Including Refis

Friday's **main source of drama** was the strong jobs report from the Labor Department. The unemployment rate dropped from 5.9% to 5.4%, easily besting expectations of 5.7%. This was accomplished despite a 0.1% increase in Americans who considered themselves part of the labor force (a statistic that is sometimes used to offset changes in the unemployment rate).

The jobs report is always important, but this one and the next one are **particularly important**. They provide 2 key data points that will help inform the timing of the Fed's decision to decrease its bond buying amounts (aka "tapering"). This would put upward pressure on rates, all other things being equal.

One member of the Fed laid out some specific numbers **before** the jobs report, saying we'd need to see around a million new jobs in the next 2 reports to justify a taper announcement on September 22nd. At 943k with another 88k of upward revisions to the previous month, this one was close enough to keep the conversation open.

New Jobs Added/Lost Each Month (NFP)

There are **other ways** to look at the job count, however. In cumulative/outright terms, we see that the labor market still has a long way to go before getting back to the pre-covid number of jobs.

The Fed is well aware of this--as are markets. They are prepared to taper **well** before that gap is closed. All they need to see is the "substantial further progress" that continues to be mentioned in official Fed communications. This is why the bond market reacted so readily to the data.

In terms of 10yr Treasury yields/rates (a bellwether for longer term rates like mortgages), there are **two ways** to look at this week's rate spike. The first would be as a **breakout** from the downward trend of the past few months.

The second would be as a **return** to the top of the recent range.

There's **no way to know** which of these options will win out ahead of time. Traders are acutely aware of the Fed's deliberations on tapering. They're eagerly awaiting any clarification from Powell at the Jackson Hole Symposium at the end of the month, and they're far more prepared for tapering this time around than they were in 2013, when it caused a **massive** jump in rates.

Ultimately, the Fed's course or action b. Data depends on many factors including an unknown path for the pandemic (and pandemic-related policies at the state and local levels).

Bottom line, stronger data increases the risks for rates, but uncertainty about covid and its impact on the economy could push back in the other direction. We'll get some indication of the market's leanings next week, but we'll ultimately be waiting to see how covid numbers and economic data fare when a majority of the country has returned to school. That makes the next month or two highly charged in terms of potential volatility in rates.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
