Looking For Silver Linings

When it comes to the mortgage and housing markets, there's been no shortage of gloomy news for months. This generally involves slumping sales, lower prices, and higher rates. All of the above are interconnected to some extent. The interconnection can be summed up in a single paragraph:

Home prices surged post-covid as demand greatly outpaced supply and low rates increased buying power. High home prices (and rents) then contributed significantly to decades-high inflation numbers. Decades-high inflation is the single biggest reason for the fastest rate spike since the 1980s. Newly high rates made buyers increasingly reluctant to shop for homes and homeowners increasingly reluctant to give up the super low rates obtained over the previous 2 years.

In January, it looked like there might be some reprieve for high rates and slumping sales. But then February happened. A series of economic reports caused an immediate renewal of fear over the inflation outlook, and again, inflation is the key input for rates right now.

The most recent addition to the inflation narrative was this week's PCE Price Index which is frequently referred to as the Federal Reserve's favorite inflation indicator. PCE doesn't usually impact markets too much. That honor is reserved for CPI (the Consumer Price Index, which comes out earlier in the month). But if PCE delivers a different message, it can get the market's attention. That's what happened this week.

By Thursday, rates were showing signs that they might be willing to calm down after several weeks spent surging quickly higher. Then Friday's PCE inflation numbers came out hotter than expected with the closely-watched "core" number, which excludes more volatile food and energy, rising back to the highest month-over-month levels in decades. This paints a very different picture than the CPI version of the data which had generally been trending lower for more than a year.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

Whether core inflation is 0.4 or 0.6 in month over month terms, that implies a range of 4.8% to 7.2% annually. That's catastrophically high in either case considering the Fed's target is 2.0%.

The Fed attempts to control inflation by raising overnight lending rates, so it was no surprise to see another bump in rate hike expectations after the data. The following chart shows the market's expectations for the Fed Funds Rate at various points in the future. Notice that December is now seen remaining very close to the high rates achieved in June/Sept ("narrow range") and that the outlook has moved higher across the board.

The Fed Funds Rate doesn't dictate mortgage rates, but the long-run rate outlook lines up very well with mortgage rate momentum, much like 10yr Treasury yields. The following chart overlays 10yr yields on the December Fed Funds Rate expectations to show the correlation.

In other words, higher inflation and stronger economic data caused traders to bet on more Fed rate hikes in the future. Longer term rates (like 10yr Treasuries and mortgage rates) moved up in response to the shift in the outlook.

Mortgage rate data isn't as granular as the charts above, but it's easy to see the big jump in February.

The silver lining here is that mortgage rates were more cautious at the end of January than they were in August. This time around the rate spike--while no doubt unpleasant--hasn't had the same sort of frantic quality. It has occurred in measured steps and each step has come in response to economic data that legitimately makes a case for higher rates. This means that rates should remain receptive when the data eventually shifts.

When that happens, there are signs that the housing market will also be receptive. To be sure, outright sales numbers have plummeted in the Existing Homes market, but the drop has been very different from the last comparable drop seen during the Financial Crisis. Back then, the mortgage market was systemically imploding and there was an unprecedented glut of inventory.

The opposite is true these days. Granted, mortgage companies have certainly been contracting due to the rapid decline in loan origination, but from an investor's standpoint, present day lending is infinitely more sound and sustainable than it was before the Financial Crisis. The inventory contrast is even clearer. Simply put: there is none!

The takeaway is that a sensible moderation in interest rates (the kind we'll see whenever economic data suggests inflation is calming down and the labor market is losing some steam) can pave the way for an uptick in inventory, affordability, and demand. That's a fairly ideal recipe for stronger sales. The only question is how long it takes for that data to show up.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
