Hotly Anticipated Inflation Data Keeps Hope Alive

As long as inflation is the top concern for financial markets, the Consumer Price Index (CPI) is the most important economic report on any given month and it came out this week. Stocks and bonds both improved sharply despite the results merely matching forecasts.

This is the reality of the market's current relationship with inflation: it's been so much higher for so much longer than expected that the absence of more bad news is actually good news.

To be fair, this report was definitely a bit better than the last with the most closely-watched metric (core, month-over-month) hitting its 0.3% forecast. That number matches the average reading over the past 12 months which is why the annual rate of core inflation remains well above its 2.0% target.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

Core inflation ultimately needs to be down in the 0.1 to 0.2 range in month-over-month terms if the annual number is to hit the 2.0% target. But the Fed will be willing to cut rates before we officially hit 2.0% as long as the monthly data makes it seem highly likely.

Both the Fed and financial markets are also watching other parts of the inflation data for reassurance about further cooling. Among these, the metric measuring home payment inflation (Owners' Equivalent Rent or OER) is arguably at the top of the list. This makes sense considering it accounts for the largest portion of the most problematic inflation category.

OER is also good to watch because it is more prone to gradual trends than other line items and it is also typically well-correlated with more timely rental data from private market sources. This allows for increased confidence that it will end up where it looks like it's headed. In fact, this belief is one reason that many market participants expected more progress in inflation by now.

OER **had been** moving in the right direction before unexpectedly pausing at elevated levels. This has been a source of confusion and consternation for market participants and Fed officials alike.

What will it take for OER to get over this stalled progress? There are several theories and/or factors, depending on whom you ask, but most answers include the factor of **time**.

Another important factor is the supply of housing--especially multi-family housing which has a more direct impact on rent price trends than other housing. In new data from the Census Bureau this week, multi-family residences were completed at one of the fastest paces in decades despite being just off recent highs.

The caveat is that new multi-family construction projects are breaking ground at much slower pace than a year ago. If "starts" are running at an annual pace of just over 300k, it's only a matter of time before completions are no longer able to remain in 500k+ territory.

The slower pace of new construction isn't specific to the multifamily sector. Even when looking at the all-inclusive numbers, building permits and housing starts have definitely been in a holding pattern as completions continue adding up.

Analyzing housing supply in order to anticipate improvements in inflation data is forward-looking to say the least. Back in the present, mortgage rates ended the week much lower than last week despite some push-back on Thursday and Friday.

In other words, rates have pulled back only slightly after a solid winning streak. Granted, you could take an even longer term view and say rates only managed the winning streak because they were at their highest levels in more than 5 months by the end of April, but nobody likes a party pooper.

Either way, we are where we are now and we're only going to see meaningful improvement if big ticket inflation data moves back toward the Fed's 2% target. With that in mind, we don't really have any big ticket data until the first week of June. Between now and then, anything goes when it comes to market movement, but it probably won't go too far in either direction until the data returns.

The only real caveat for next week is the Fed. There will not be a new Fed announcement, but there are multiple speakers on the circuit as well as the release of the minutes from the most recent Fed meeting. If we had to guess, we'd say the market is already well aware of the Fed's current stance, but it's always prudent to consider potential volatility surrounding any major Fed communication.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
