Are Rates Done Freaking Out Yet?

Mortgage rates bounced hard off the long term lows back in September and had jumped almost a full percent by last week. In addition to the elevated levels, there's been plenty of volatility. Nonetheless, rates managed to avoid breaking last week's ceiling--even if only just. Does that mean it's time for hope?

Hope is always a fine thing to have, but it's not a strategy when it comes to mortgage rates. Even if we consider that rates are based on financial markets, caution still makes sense. Some market analysis might suggest this week's ground-holding in rates is indeed a sign of a potential longer-term ceiling, but other analysis suggests an ongoing uptrend. Neither is right or wrong considering the future can never be accurately predicted when it comes to rates.

The mortgage rate chart shows the "lower high" in terms of daily rates.

Because mortgage rates don't change more than a few times a day, we have to look at bonds to track intraday changes. Using the 10yr Treasury yield as a benchmark, we can see the persistent uptrend in yields. Treasury yields tend

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

to move in the same direction as mortgage rates with almost perfect correlation.

If we want to hold out hope for rates to move lower, it would help to be able to pin those hopes to objective developments. On that note, all we have are economic reports and inflation. Simply put, inflation would need to move lower and the economy would need to weaken in order to make a case for meaningfully lower rates. None of this week's data supports that case.

That said, this week's data wasn't overly troubling either. The Consumer Price Index (CPI) came in right in line with forecasts earlier this week. Unfortunately, those forecasts weren't low enough for annual inflation to hit its target. We wouldn't have expected an annual target to be hit any time soon, but the fact is that monthly inflation needs to average 0.17-ish in order to hit a 2.0% target, and monthly inflation came in at 0.3% at the core level for the third month in a row.

Core Annual Inflation

Core Inflation, Monthly

The annual chart of inflation makes it seem like progress is stalling, whereas it might be easier to imagine the continuation of a trend toward target levels in the monthly chart. In fact, neither assessment is right or wrong and we're increasingly see the Federal Reserve acknowledge that.

Multiple Fed officials gave speeches and/or participated in Q&A events this week and the tone was markedly different than it was the last time they were out in force. Here are a few highlights, paraphrased:

Fed's Kashkari

- Confident in path of inflation but don't want to declare victory
- May take a year or two to achieve 2% goal
- If inflation surprises to the upside, that could affect rate cut plans

Fed's Schmid

- Remains to be seen how much more the Fed will cut and where rates may settle

Fed's Logan

- Seeing signs that the Fed may not need to cut rates as low as previously thought in order for inflation and job growth to be in balance.

Fed's Musalem

- There's some sense of higher inflation risk and some sense the Fed may not cut rates as much
- Data since the last meeting suggests economy may be stronger than expected

Fed's Powell

- Economy sending signals that we don't need to be in a hurry to cut rates
- Expects inflation to continue toward 2%, but it's a bumpy path

This isn't necessarily surprising from the Fed, but it's definitely a change from where their collective heads were at in September. At that time, we'd just seen a few significantly weaker employment reports and inflation data that was more indicative of gradual improvement. Since then, those weak employment numbers have been revised higher and inflation has ticked up.

The Fed along with the rest of the financial market is waiting to see if the data will show a big of a resurgence of growth and inflation. If that happens, rates could easily continue to move higher. If data softens again, rates have room to recover to lower levels. Either way, the data will be the determining factor--especially the jobs report in early December.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
