Biggest Weekly Jump For Rates In Quite a While. Will it Keep Going or Calm Down?

Whether we're talking about mortgage rates or a quintessential yard stick of the rate world like the 10yr Treasury yield, it was the roughest week in quite a while.

Nearly every corner of the market continues reacting in volatile fashion to last week's tariff announcement and the subsequent updates. Momentum toward higher rates took on a life of its own this week for laundry list of mostly esoteric reasons.

Meanwhile, the typical sources of market inspiration fell on deaf ears. Notably, both of this week's inflation reports were much lower than expected. That would typically be great news, but instead, rates kept on moving relentlessly higher.

When it comes to 10yr Treasuries, you would need to go back to 1981 to see a bigger jump.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

Is this alarming? Does it suggest that some massive shift is taking place that will re-write the global economic order?

Some would say yes. Others would laugh. Many would be somewhere in between with quite a few qualifying ideas. No one would deny that the answer ultimately depends on things that have yet to happen.

One great way to find some perspective is to consider the 1 week chart of 10yr Treasury yields above against a 2 week chart below. In other words, it's the exact same data, but over a 2 week time frame instead of week-over-week. Spoiler alert: it's not ideal, but definitely not as alarming as the first chart.

With that in mind, there's a lot riding on the coming week and a half to flesh out the bigger picture. In the meantime, mortgage rates are definitely elevated--much more so than the typical news article has yet conveyed.

In the chart above, it's normal for the blue line to generally operate above the other two. The important observation is the extent to which big moves in the blue line (actual daily average rates) lead subsequent moves in the other lines (surveys that have a reporting lag). Unfortunately, many news outlets report on the weekly surveys as if those rates are still available. Instead, they're just a look back to what was available last week.

Here too, there's perspective. After all, mortgage rates were noticeably higher just a few months ago. Moreover, we've certainly seen a few weeks with a 0.50% jump over the past few years. So the question remains: will the coming weeks add insult to injury, or will they help mellow out the bigger picture message? The answer can't be known today. The best bet is to understand the potential for additional volatility and be prepared to react accordingly.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
