Some Uncertainty at The End of an Otherwise Decent Week

The week began with some challenges for the rate market and a bounce for stocks following the US/China trade deal over the weekend. Stocks held their gains, but rates managed to move back down by the end of the week. Thursday was the only important day in that regard with rates benefiting from weaker Retail Sales data and a well-received speech from Fed Chair Powell.

Friday began on an even stronger note for the underlying bond market (bonds dictate interest rate movement), but that didn't last long after the Consumer Sentiment data showed the highest inflation expectations since 1981.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

We know that inflation is bad for rates, but do rates really care about some consumer survey? At times, yes! The rationale is that if consumers are sufficiently convinced that prices will go up for things they want to buy, they will buy more of those things sooner than they otherwise would, thus increasing prices via a scarcity of supply.

Consumer expectations are certainly far from the best inflation indicator. They're just another tool to flesh out the bigger picture. In this particular case, the survey wasn't as relevant as it might have been due to timing. Based on the survey's methodology the assumption is that most of the responses were recorded **before** the big US/China trade announcement on Monday.

Friday ended up seeing an even more compelling source of volatility. With 15 minutes left in the trading day, the ratings agency Moody's announced a downgrade of the US' credit rating. This has happened before, typically when congress is in the throes of debating the debt ceiling, a government shutdown, or in this case, the budget bill.

Due to limited past examples, there's no telling if this will still be impacting markets by the end of next week. Some will remember 2011's example and the massive drop in interest rates that followed, but they'll likely overlook the role that the European credit crisis was playing at the time.

Because we only saw 15 minutes of market reaction, all we know is that it caused modest but swift upward movement in bond yields at the time (yields correlate with interest rates).

If we zoom the chart out a bit, we can still see Friday's jump in yields, but just barely. It's not remotely on the same scale of volatility as the early April tariff reaction.

10yr Treasury Yield

As for mortgage rates, most lenders didn't have time left in the day to react to the Moody's news. Based on the underlying market movement in mortgage bonds, Friday likely would have ended with 30yr fixed rates being slightly higher than Thursday, but not as high as Wednesday.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
