Fed Holds Steady; Mortgage Rates Fall

This week ended up being underwhelming in terms of interest rate movement despite the much-anticipated Fed announcement on Wednesday.

Anticipation aside, there was zero chance of a rate cut at this week's meeting. While that has some voices in the mortgage/housing space up in arms, our pre-Fed thesis bears repeating.

This doesn't necessarily mean that mortgage rates would have risen in response to a Fed rate cut this time around. Rather, it's a reminder that the Fed doesn't set mortgage rates and that the Fed Funds Rate won't necessarily correlate with mortgage rates except in the biggest of pictures (and even then, only because both rates correlate with the broader economy and inflation).

This week's Fed announcement was nonetheless still potentially interesting due to other things the Fed may have said. First up was the dot plot--a chart that shows individual Fed members' projection for the Fed Funds Rate in the

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

future. The dots showed a division among Fed members with some seeing more cuts than last time, but slightly more seeing higher rates.

The divergence is due to differing interpretations of the tariff implementation. Some see a higher likelihood of a negative economic impact (which would lead them to foresee lower rates) while others are more concerned with the potential inflationary impact (which would lead others to keep rates where they are).

Either way, the party line has been fairly clear and unified: the Fed feels like it can wait to decide on cutting until it has more time to assess which outcome is winning.

None of this was very exciting for rates this week. Recent economic reports have had a far bigger impact, as seen in the following chart of 10yr Treasury yields (a common benchmark for longer term interest rates, like mortgages).

US 10yr Treasury Yield

It wasn't just longer term rates. Even if we drill down to specific Fed Funds Rate expectations, we saw far more movement in response to a few comments from Fed speakers on Friday than we did to Wednesday's Fed announcement itself.

Fed Funds Rate Expectations, Dec 2025

Friday's comments represented the more dovish concerns of some Fed members. Specifically, Fed's Waller said there was room to look through the inflationary impact of tariffs and bring rates down a bit. He'd rather start cutting slowly now in order to preempt undue economic stress, and then reassess any unforeseen tariff impacts before cutting further.

All of the above coincided with mortgage rates enjoying an ongoing but exceedingly gentle decline after hitting multi-month highs on May 21st.

In housing related news this week, construction metrics languished with housing starts and builder sentiment near recent lows.

On a positive note, a closer examination shows a slight uptick in housing starts for single family homes. In other words, the multifamily sector drove the decline.

Next week brings more housing data with updated home price indexes on Tuesday, new home sales on Wednesday, and Pending Home Sales on Thursday. There will be a slew of additional Fed speakers including Powell's semi annual congressional testimony as well as a relatively important inflation report (PCE) on Friday.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
