After Holiday Hangover, Rates Are Ready to Get Serious About Inflation Data

Mortgage rates partied hard for most of June and into the middle of last week--right up until stronger economic data killed the vibe. The resulting bounce in rates carried momentum through to the beginning of this week, but from there on out, things were broadly sideways.

That's not too surprising considering the lack of virtually any major economic data this week. Such data is one of the key sources of motivation for the bonds that underlie mortgage rate movement. Without it, inspiration had to be found elsewhere.

Last week's rising rate momentum lasted through Tuesday. After that, there was modest volatility surrounding trade-related headlines, Fed comments, and Treasury auctions, but nothing too significant in the bigger picture. By the end of the week, rates and Treasury yields were right in line with Tuesday's levels.

National Average Mortgage Rates

Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

Actionable data will return in the coming week. In fact, Tuesday's Consumer Price Index (CPI) could be just as much of a flashpoint as the jobs report if it shows (or completely fails to show) the onset of tariff-driven inflation.

Why would that matter?

First off, bonds simply don't like inflation and rates will generally be moving higher if inflation is moving higher. Additionally, the prospect of tariff-driven inflation is preventing the Federal Reserve from initiating rate cuts that would otherwise be justified by the current landscape of econ data and monetary policy.

Bottom line: if inflation does NOT show up in a big way in next week's CPI, the market could move fairly quickly to price in expectations for a lower Fed Funds Rate. And remember: Fed rate cut EXPECTATIONS have a far more immediate impact on mortgage rates than an actual Fed rate cut.

Of course, the opposite scenario could play out as well (higher-than-expected inflation and another jump in mortgage rates).

There's no guarantee or even any reason to expect one outcome versus another. All we can know ahead of time is that there is a high potential for data-driven volatility.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
