Are Rates About to Make a Move Because of The Fed?

December 10th will be the most interesting Fed announcement in more than a year. It's the first time since mid-2024 where a rate cut (or lack thereof) has not been a foregone conclusion. This means the Fed has a chance, albeit a small one, to surprise the market.

The market currently sees a better-than-85% chance of a cut at next week's meeting according to Fed Funds Futures (contracts that effectively allow traders to bet on the future level of the Fed Funds Rate). Typically, futures indicate a 95%+ likelihood of a certain outcome.

The most optimistic conclusion would be that a rate cut would surprise a larger part of the market than normal and thus put downward pressure on other rates. Unfortunately, it's more complicated than that.

Even if 15% of the market is surprised by a rate cut, the impact on longer-term rates will be influenced by several other factors. Most notably, this is one of the 4 meetings per year that includes a dot plot (updated rate forecasts from each Fed member).

The dots get plenty of attention--so much so that they can steal the spotlight from a rate cut decision. For instance, the Fed could cut rates next week, but the dots could show a decreased willingness to consider additional cuts in 2026. If the message in the dot plot was gloomy enough, it could push other rates higher even as the Fed is cutting its overnight rate.

In addition to the dots, the Fed Chair always has an opportunity to push back on the market's takeaway during the press conference that begins 30 minutes after the rate announcement.

Last but not least, the market may simply wait to make bigger moves until it has the results of November's jobs report. The jobs data would have come out today if not for the government shutdown. That would have helped the market further refine its expectations for next week's Fed decision. As it stands, the release is delayed until December 16th.

As far as "bigger moves" are concerned, mortgage rates arguably haven't seen any since early September. Since then, average 30yr fixed rates have been broadly sideways near the lowest levels since late 2024.

National Average Mortgage Rates

	Rate	Change	Points
Mortgage News Daily			
30YR Fixed	7.27%	-0.02	0.00
15YR Fixed	6.92%	-0.03	0.00
30YR FHA	6.90%	-0.01	0.00
30YR Jumbo	7.55%	0.00	0.00
7/6 SOFR	6.78%	-0.10	0.00
30YR VA	6.91%	-0.01	0.00

Rates as of: 10/30

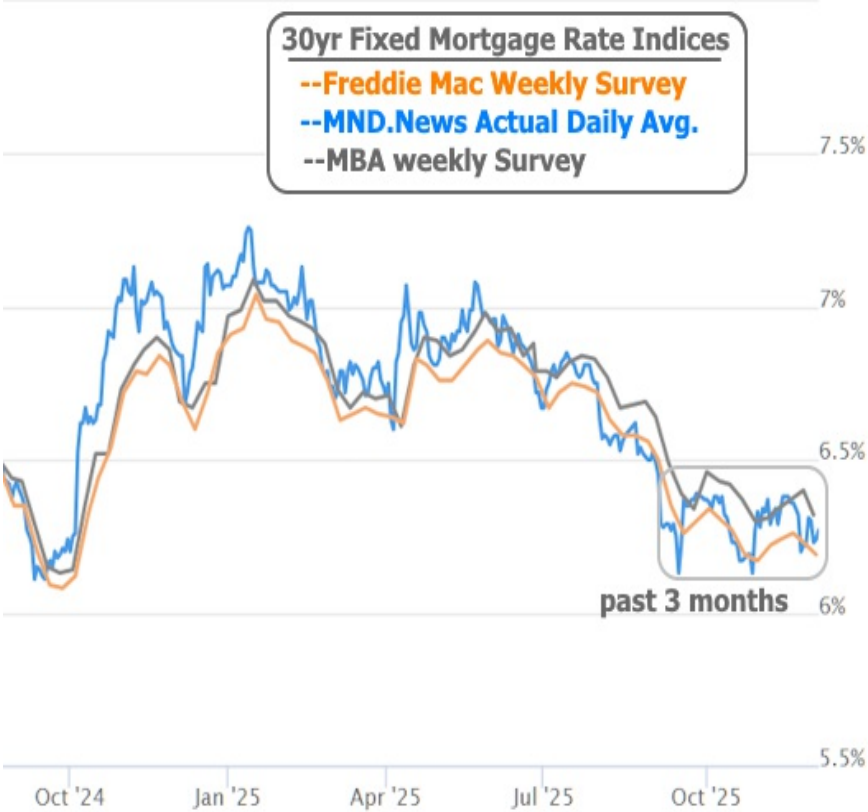

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.81	-0.02
10 YR Treasury	4.9299	+0.0084
30 YR Treasury	5.3082	+0.0081

Pricing as of: 10/30 5:59PM EST

Recent Housing Data

		Value	Change
Mortgage Apps	Oct 21	195	+3.39%
Building Permits	Sep	1.4M	+0.43%
Housing Starts	Sep	1.22M	-4.24%
New Home Sales	Sep	676K	-1.17%
Pending Home Sales	Aug	71.2	0%
Existing Home Sales	Oct	3.99M	+0.25%
Builder Confidence	Oct	29	-9.38%

If there's one potential economic data wild card before Fed Day, it would be Tuesday morning's release of Job Openings. It will be the first big ticket data from the Bureau of Labor Statistics (BLS) for the month of October since the shutdown ended. It could be more closely watched than normal.

Job Openings data typically runs a month behind the jobs report. But due to the shutdown, October's jobs report never came out in early November. Only half of the report was able to be retroactively completed and it won't be released until we get the November jobs report on December 16th. Long story short, this will be the first and perhaps only time that Job Openings data for any given month is available prior to the jobs report data.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
