Lowest Rates in Weeks After Jobs Report and Oil Price Drop

Mortgage rates moved lower almost every day this week with most of the help coming from war-related headlines and a last minute boost from the jobs report.

Rates are driven by bonds and the bond market dynamic is surprisingly simple these days. Oil price volatility is a constant source of inspiration with rates generally moving the same direction as oil. Additional considerations include the usual suspects like big-ticket economic reports and any notable updates from the Federal Reserve.

This week saw several positive developments in Iran, either related to the pace of fighting or the prospects for reopening the Straight of Hormuz. Oil prices responded accordingly and bond yields (aka "rates") generally followed.

The chart below shows 10yr Treasury yields and oil futures this week with the notable movement highlighted. The additional rise in 10yr yields on Thursday came courtesy of a large corporate bond announcement (this increases supply in the bond market which, in turn, lowers prices and increases yields/rates).

National Average Mortgage Rates

Mortgage News Daily	Rate	Change	Points
30YR Fixed	7.33%	-0.12	0.00
15YR Fixed	6.89%	-0.10	0.00
30YR FHA	6.95%	-0.10	0.00
30YR Jumbo	7.44%	-0.06	0.00
7/6 SOFR	6.81%	-0.19	0.00
30YR VA	6.97%	-0.10	0.00

Rates as of: 11/20

MBS and Treasury

	Price / Yield	Change
MBS UMBS 6.0	99.51	+0.41
10 YR Treasury	4.9403	-0.1033
30 YR Treasury	5.3324	-0.0738

Pricing as of: 11/20 5:59PM EST

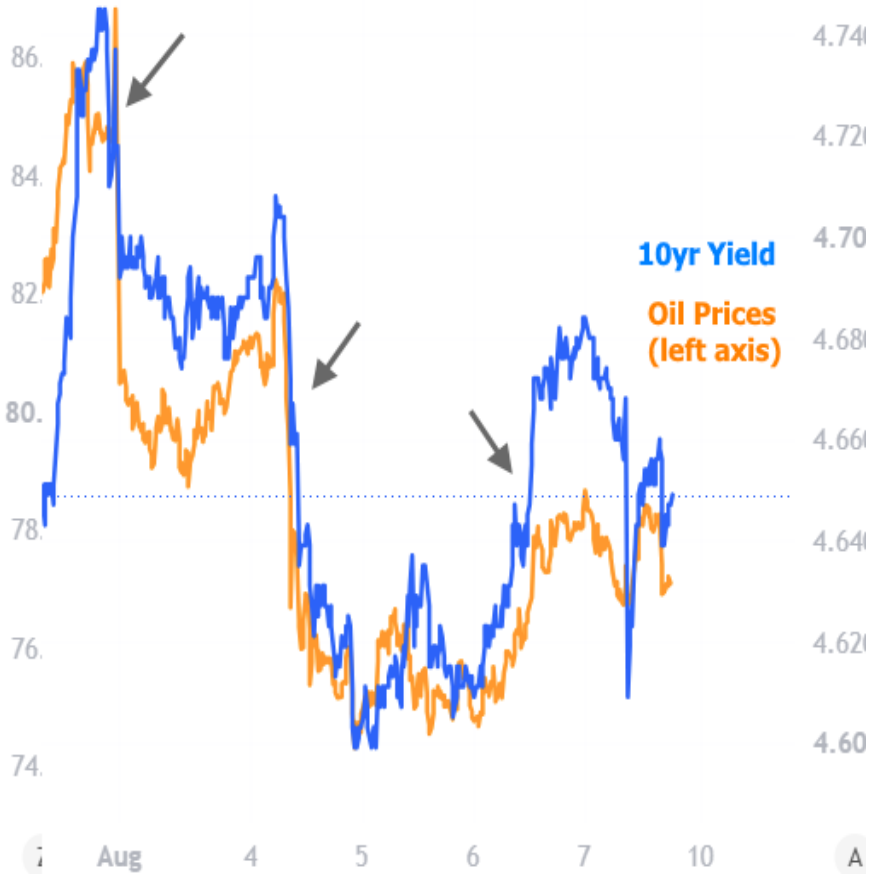

Recent Housing Data

The big drop in bond yields seen on Friday came after the release of the latest monthly jobs report which showed much lower than expected job creation. The job count (officially "nonfarm payrolls") came in at -23k versus expectations of +80k. Traditionally, that would result in a massive drop in rates. These days, however, markets are more and more interested in the unemployment rate, which actually moved 0.1% lower from last month.

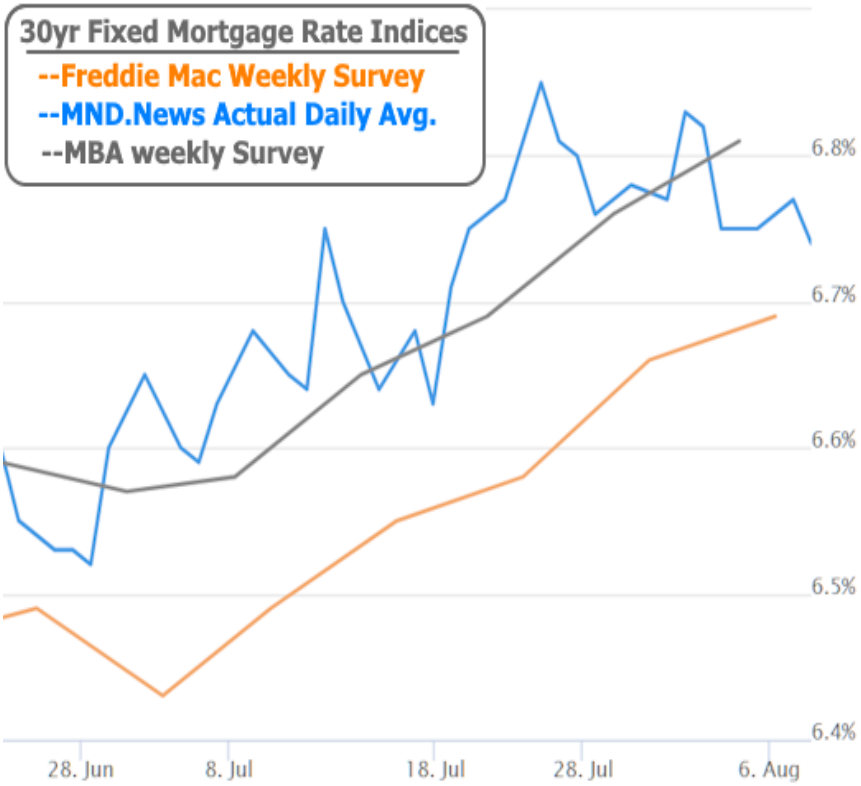

How can the economy lose jobs but have a lower unemployment rate? The latter is a math equation based on the total of people who consider themselves "in the job market." If they respond to a survey saying they have a job, they count as employed. Meanwhile, the official job count comes from business surveys. It can show a decline in the number of jobs without impacting unemployment if fewer people say they're in the market for a job.

All that having been said, rates still improved from Thursday to Friday, ultimately ending the week at the lowest levels since July 20th. Weekly, survey-based rate indices have yet to catch up to the drop in daily rates measured by Mortgage News Daily.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
