Markets Were Anxious Over Powell, But Next Week Deserves More Attention

As the week began, the bond market continued heading toward higher rates at the same pace seen in the previous week. This made for the highest mortgage rates in more than 2 decades on both Monday and Tuesday (albeit not much higher than those seen in late 2022). Things calmed down on Wednesday as multiple European countries logged slower economic growth in a closely watched series of data. The US version of the same data was also weaker than expected, thus helping rates have their best day in several weeks and one of the best days in several months.

In general, weaker economic data coincides with falling rates. This is econ 101, but it's also a concept that the Fed has been driving home increasingly in the current environment. Rather than worry about weaker data, the Fed sees stronger data as a bigger risk. The economy has been more resilient than expected in the face of significantly higher rates, and the Fed has been clear in saying that it has little incentive to cut rates until the data suggests a bigger negative impact.

National Average Mortgage Rates

Rate Change Points

Mortgage News Daily

30 Yr. Fixed	7.09%	+0.07	0.00
15 Yr. Fixed	6.56%	+0.03	0.00
30 Yr. FHA	6.62%	+0.07	0.00

Recent Housing Data

		Value	Change
Mortgage Apps	May 15	198.1	+0.51%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

Additionally, while many on the Fed have mentioned the possibility that rate hikes are done for now, just as many have expressed uncertainty as to whether additional hikes would be needed. The key determining factor would be inflation, but the Fed's concern is that economic strength could translate to unexpected resilience in inflation.

The market was looking forward (perhaps a bit too forward) to getting some greater clarity on these and other topics from Fed Chair Powell at Friday's annual Jackson Hole Symposium.

Hosted by the Kansas City Federal Reserve Bank, Jackson Hole draws central bankers and economists from around the world and has occasionally served as a venue that offers a sneak peek at potential shifts in policy or the economy itself.

More frequently, Jackson Hole is notable only for its great expectations and underwhelming reality. This year's example mostly falls into this category.

Powell was slated for the opening remarks. Market watchers were waiting for him to say something about the "neutral rate of return" (also R^* or "R-Star")--a hypothetical policy rate resulting in stable economic growth and stable, on-target inflation. The recent obsession over R-Star is due to the fear that the low baseline for interest rates has moved up permanently for a variety of reasons that can't possibly be determined or calculated any time soon.

As such, it wasn't too surprising to hear Powell say "we cannot identify with certainty the neutral rate of interest, and thus there is always uncertainty about the precise level of monetary policy restraint." Translation: he has no idea if R-Star is changing or will change.

The other even crazier anticipation surrounded the Fed's 2% inflation target with some market watchers wondering if the Fed was considering increasing the target due to the same sort of underlying structural issues that would underpin a higher R-star. Powell was even more clear on that topic: "Two percent is and will remain our inflation target."

In addition, the Fed Chair was extremely consistent with the press conference from July with respect to the delicate dance of fighting inflation without crippling the economy. On both occasions, by his own admission, they are flying blind to some extent. In his words, the Fed is "navigating by the stars under cloudy skies," and that "we will proceed carefully as we decide whether to tighten further or, instead, to hold the policy rate constant and await further data."

The market was apparently hoping for something a bit more rate-friendly. The reaction largely consisted of the futures market shifting bets on the level of the Fed Funds Rate at various points in the future. It's not so much that traders thought Powell was saying the Fed was more inclined to hike, but instead, simply less inclined to cut as quickly. In other words, markets were pricing in almost 2 rate cuts of 0.25% in by the middle of next year, but after this week, it's closer to only 1 rate cut.

All of the above kept some pressure on longer term bonds on Friday morning, resulting in the average mortgage lender offering higher rates out of the gate. As the day progressed and bonds stabilized, several lenders offered mid-day improvements. The net effect was slightly higher rates for the average lender, but not as high as those seen at the beginning of the week.

When it comes to events that inspire volatility, next week is a higher probability than Jackson Hole. There are multiple economic reports with strong, recent track records of influencing the bond market and, thus, interest rates. Starting on Tuesday, there is an important report every single day of the week. Several days have more than one, and Friday will bring the release of the jobs report for August--arguably the most important report of any given month.

About Your Los Angeles Mortgage Broker

Shannon's expertise in residential mortgage lending spans more than 20 years. Beginning on the ground floor of the wholesale side of lending, Shannon subsequently succeeded as a loan officer, account manager, and account executive while working for one of the nation's largest mortgage lenders. In contrast to those who chose to leave the mortgage industry when the Los Angeles housing market began to spiral in 2008; Shannon's passion for helping others to become homeowners remained firmly intact. In fact the changes in the market and new lending laws made her want to help homebuyers to navigate the new rules of real estate lending more than ever. As such, she chose to transition to the retail side of real estate financing in effort to work closer with families, veterans, and those who had previous financial hardships to achieve their goals of home ownership. As a homeowner and real estate investor, Shannon's personal experience in obtaining mortgage loans for her own purchases is extensive. She has bought and sold multiple properties and continues to invest in real estate throughout Los Angeles County. Shannon's specialization and breadth of experience in real estate purchase loans enables her to offer standard/conventional loans, government loans, hard money loans, and specialty/portfolio products.
